

#Get the FACTS

Many vape products contain nicotine which is a very addictive substance.

Some people show signs of addiction within days after starting to vape.

#Get the FACTS

Vape products
are not
harmless. Health
Canada states
that there are
health risks
linked to
chemicals found
in vapour
products.

#Get the FACTS

A new study found that teenagers who vape have double the risk of smoking tobacco cigarettes.

#Get the FACTS

Most VAPING
products
contain an
unhealthy dose
of nicotine and
other
chemicals!

#Get the FACTS

Health Canada
found that
about half of
e-juices that
were labelled
"nicotine free"
actually
contained
nicotine.

#Get the FACTS

Vaping "steam"
consists of fine
particles
containing
propylene glycol,
glycerin,
flavourings and
other chemicals.

#Get the FACTS

Vapour
products
don't contain
tobacco but
many
contain
nicotine.
